

zomato

FEATURE ANALYSIS: ENHANCING ZOMATO'S LAST-MILE EXPERIENCE

*A user-centric proposal to boost trust, transparency, and
delivery efficiency*

Submitted By
Ayesha Bamahdi

THE UNSEEN SIDE OF DELIVERY: THE USER PROBLEM

Users don't know who's delivering their food – causes anxiety & lack of trust

Lack of live updates on delivery status – leads to user confusion

No way to rate delivery interaction immediately – feedback loop missing

Poor communication = high anxiety – no way to connect quickly

Before? Missed calls, no info, just vibes 😓 – outdated, stressful system

The slide features a light pink background decorated with various tomato illustrations. In the top left, there are two whole tomatoes with green stems and small faces. In the top right, there is a stack of four tomato slices. On the left side, there is a stack of five tomato slices. At the bottom, there are three tomato slices in the center and two whole tomatoes on the right. A white rounded rectangle with a red spiral on the left and a red squiggle on the right contains the title.

FRAMING THE CORE PROBLEM

“Zomato users need real-time delivery partner details and accurate ETAs because delivery uncertainty causes frustration, reduces trust, and breaks the post-order experience.”

WHAT DO USERS REALLY NEED? 🤔

When I order food, I want to know who's delivering it and when it'll arrive so I feel informed, confident, and in control throughout the experience

Why it Matters?

Real-Time Updates

Identity & Trust

Empowerment

Timing & Predictability

The slide features a light pink background decorated with several cartoon-style tomatoes. Some are whole with green stems and small faces, while others are sliced to show seeds. There are also orange and red swirls scattered around the content. The main title is centered in a white rounded rectangle.

ZOMATO DELIVERY TRANSPARENCY + ETA ACCURACY

Impact Factor	Description
Reach	Impacts almost every Zomato delivery user, especially regular app users
Frequency	Happens with every food order, more intense during peak hours & weekends
Severity	High - causes frustration, uncertainty, and leads to poor customer experience
Business Cost	Increases support call volume, drives down NPS, and affects repeat orders
User Trust Impact	Erodes trust in delivery system and ETA reliability and reduces app stickiness
Experience Breakdown	Creates disconnect between ordering and receiving experience
Reputational Risk	Negative reviews often cite inaccurate ETA and lack of transparency

ETA INACCURACY: A TRUST BREAKER

Close, But No Cigar

ETA often inaccurate - doesn't reflect real-time road or prep conditions

No transparency when delays occur

Traffic, weather, prep time not factored dynamically

Support flooded with "Where's my food?" calls

Trust suffers when ETA changes suddenly or too late

FROM HUNGER TO HAPPINESS

🔧 WHAT WORKS, WHAT DOESN'T

✅ Green Flags	❌ Red Flags
Quick ETA Display	ETA Doesn't Update Frequently
Basic Delivery Partner Info	Delay Reasons Are Generic
Map-Based Tracking	Delivery Info is Minimal
Order Status Notifications	Low Feedback Engagement
Feedback Prompt Available	Support Still Contacted Frequently

AI-POWERED DELIVERY PROFILES + SMART ETA

Delivery Partner Card

Users can see the rider's name, rating, and number of past deliveries. This builds credibility, reducing user anxiety during delivery.

Preferred language option enhances communication and makes the experience more comfortable for users.

A personalized rider card creates a relatable, human connection, removing the “faceless” aspect of delivery.

AI-Powered ETA: 18 minutes

 On time delivery rate: 98%

ID: ZMT58294

AI-Optimized ETA (Accurate Real-Time Predictions)

Real-time data adjusts ETA based on traffic, weather, and restaurant status, improving accuracy.

AI uses historical patterns to predict and adjust ETA, minimizing uncertainty.

Accurate ETAs reduce discrepancies, increasing trust and satisfaction.

Keywords: Real-time Data | Predictive Insights | Dynamic ETA | User Satisfaction

Language-Matched Communication Prompts

Language preferences ensure that users receive communication (via SMS or in-app messages) in their preferred language, enhancing the experience for non-English speakers.

Instant, clear communication about delivery status and rider issues (e.g., delay) in the user's own language reduces confusion and improves overall user satisfaction

Adding personalized greetings and updates in the user's native language promotes a sense of care and customer-first approach, improving their loyalty to Zomato.

AI-POWERED DELIVERY PROFILES + SMART ETA

One-Tap Delivery Feedback (Instant Feedback Loop)

Users provide quick ratings, immediately processed for sentiment analysis and action.

Feedback is sent directly to managers for immediate rider performance improvements.

Continuous feedback loop refines Zomato's service by leveraging user insights for better experiences.

Encourages users to participate in the process, ensuring their voice is heard after each delivery.

Data-driven improvements based on real user input help Zomato deliver an even better service.

Keywords: Live Tracking | Transparency | Predictability | User Confidence | Fewer Support Calls

AI-POWERED DELIVERY PROFILES + SMART ETA

Live Map Tracking

Real-time map view gives full journey visibility

Dynamic progress lets users know exactly when to expect delivery

Get notified early about delays or rider movement

Helps users time their availability (e.g., to reach the gate)

Reduces anxiety-driven support queries or calls to rider

Builds trust by removing the guesswork

Keywords: Live Tracking | Transparency | Predictability | User Confidence | Fewer Support Calls

WHY THESE FEATURE MATTERS?

 Builds Trust → Improved User Retention

 Feedback Loop = Smarter Delivery Partner Performance

 Real-Time ETA → Fewer Support Calls

 Better Delivery = Higher NPS & Order Frequency

 Personalization = Competitive Edge

MEASURING WHAT MATTERS?

KPIs (Key Performance Indicators):

- ✓ % Increase in Post-Delivery Feedback Submissions
- ✓ % Reduction in ETA-Related Complaints
- ✓ Avg. Delivery Partner Rating Improvement

OKRs (Objectives & Key Results):

- ✓ **Objective:** Increase delivery transparency and satisfaction
- ✓ **KR1:** Improve ETA accuracy by 30% within 3 months
- ✓ **KR2:** Boost post-delivery feedback rate by 40%.

**BECAUSE GREAT FOOD
DESERVES A GREAT
DELIVERY**

THANK YOU!
